

Tier 1 Prediction controls

completed MLIP outputs (MACE, CHGNet, Orb, MatPES) - not truth

Tier 2 Reference targets

curated 0 K table: published PBE tensors, PW91 fallback (Au), scalar-rescaled r2SCAN; experiment

Tier 3 Computed all-electron anchor

paired PBE / r2SCAN elastic tensors under one frozen protocol - PREREGISTERED, NOT EXECUTED

registered roster 15 metals; benchmark 16 metals; overlap 14
